

CRTrack

Real Time Asset Tracking Technology

CRTrack: Knowledge is Power

Why purchase or lease tools and equipment you already own? Let CRTrack save you cash by keeping you informed!

- ◆ *CRTrack* provides customers with automated, mobile real-time asset tracking technology that readily transfers from jobsite to jobsite
- ◆ *CRTrack* eliminates the need to rent or buy equipment because the contractor does not know the location of the existing asset
- ◆ *CRTrack* utilizes GPS and cellular infrastructure to AUTOMATICALLY position assets at the proper jobsite
- ◆ *CRTrack* requires nothing more than a web browser, eliminating the need for additional software
- ◆ *CRTrack* is an ASP based service, enabling access 24/7/365 via any web connection or cell phone
- ◆ *CRTrack* is password protected, allowing only approved individuals access to confidential data
- ◆ *CRTrack* allows manual data entry via cell phone keypad (hour meter reading) and/or web interface
- ◆ *CRTrack* imports and exports existing asset data—including *ToolWatch* data—with ease
- ◆ *CRTrack* provides onsite training, installation manuals and end user manuals to ensure all users are totally comfortable
- ◆ *CRTrack* provides notification via email for scheduled maintenance by preset dates or equipment usage hours
- ◆ *CRTrack* offers customer support and technical support via telephone or email
- ◆ *CRTrack* includes 128-bit encryption to ensure data protection

CRTrack offers more quality features than any other competitor... at a fraction of the cost!
